

Hour of Code Participation Guide

Anyone, anywhere can learn.

Join in for Computer Science Education Week, December 5-11, 2016!

1 Details on Hour of Code activities

Code.org hosts fun, hour-long activities for students of all ages, created by a variety of partners and for a variety of subjects. (Want to do an Hour of Code in your English or history class? We've got options for that!) Try out options at code.org/learn.

Hour of Code activities:

- Require minimal prep from teachers
- Have self-guided and teacher-led options—allowing students to learn at their own pace and skill-level

Code.org's own activities feature Minecraft, Star Wars, Disney's *Frozen*, Angry Birds, and Plants vs. Zombies.

2 Sign up your classroom and recruit your school

Are you a teacher? Host an Hour of Code event for all your students throughout the week. Urge other teachers to do the same.

Are you a principal? Plan for your entire student body to do the Hour of Code. You don't need a computer for every child.

Are you a superintendent? Challenge every school in your district to sign up.

Are you a parent? Pass this guide on to your local school. Volunteer to help.

How do you go bigger with your school?

- Share this brochure with your principal to get every student at your school on board.
- Tell us about your Hour of Code at hourofcode.com

3 Plan your technology needs—computers are optional

The best Hour of Code experience involves Internet-connected computers that can access web-based activities. No downloads or sign-ins are required.

And you don't need a computer for every student! Here are a few options:

In the computer lab: Bring your class to the computer lab for one period so students can do the Hour of Code together.

In your classroom: If your classroom already has Internet-connected computers, tablets, or laptop carts, your students can take turns doing the Hour of Code throughout the week.

Work in pairs: This requires fewer computers, and students collaborate to learn more.

On the board: If your classroom has a web-connected projector, the entire classroom can do an Hour of Code together on the shared screen.

Engage parents to bring hardware: Ask parents to bring in tablets or laptops for the class to share (in schools that have WiFi).

Use mobile devices: If your school doesn't have enough computers or Internet access, many of the one-hour activities will also work on smartphones and tablets.

Go unplugged: We also offer "unplugged" activities that teach basic principles of computer science—and no electronic devices are required.

Find how-to resources for educators at hourofcode.com/resources.

4 Spread the word to students and parents

Share promotional materials. Inspire students with videos and posters. Find everything you need at hourofcode.com/resources.

Tell parents. Make sure parents know the Hour of Code is coming. Encourage them to participate too. Students with engaged parents are more likely to pursue computer science. Parental involvement is critical to building the support we need to bring computer science to every K-12 school. See a sample email to parents at hourofcode.com/resources.

Reward participants. Go big and create prizes and awards for Hour of Code participants, whether for students or teachers.

5 Celebrate your Hour of Code

There are tons of ways to kick off the Hour of Code in your community during December 5-11, joining celebrations around the world!

Host a school-wide assembly. Show a Code.org video or invite a speaker and try an “unplugged” activity with students in front of the entire school.

Contact press and local officials. Tell them about your school’s participation in the international Hour of Code movement.

Invite the community. Parents, grandparents, volunteers, and business leaders can all learn to code, too. In high schools, the Hour of Code can also be used to recruit students for spring computer science courses.

Celebrate! Share your experience and photos on social media with [#HourOfCode](https://twitter.com/HourOfCode).

6 Keep learning! Go beyond the Hour of Code.

Here’s what you and your students can do after finishing the Hour of Code:

Continue learning in class or online. Keep going with Code.org’s online learning platform, Code Studio, where you can track student progress as they learn at their own pace, or find the best learning resources for your classroom at code.org/educate.

Add computer science to your school’s curriculum. Visit code.org/educate to learn how to bring computer science courses and professional development to your school or district. If you’re an elementary school teacher, find free, one-day workshops in your area at code.org/k5.

Help remove policy obstacles to computer science. Code.org and its partners are working to change policies at the federal, state, and local level that will increase access to computer science for all students. Learn about what’s happening in your area and how you can help at code.org/promote.

Mark your calendars for December 5-11, 2016!
